

Effective Site Response Analysis

Procedure

- 1) Run opensees
`opensees <freeFieldEffective.tcl 2>LOG 1>OUT`
- 2) Postprocess results and create plots using matlab or python (run as a batch job)
`matlab -nosplash -logfile "file.log" -minimize -r "accelPlot.m; exit"`
- 3) Create report using latex/word or other word processor
`pdflatex ShortReport.tex`
